

VIBRA-DRUM®

VIBRATORY AGGLOMERATOR

The General Kinematics VIBRA-DRUM® vibratory agglomerator is a patented, compact, and proven continuous system.

The VIBRA-DRUM® utilizes vibratory motion to create a gentle tumbling action that orients and agglomerates chopped fiberglass strands into high quality, free flowing bundles.

Advantages

- ✓ Small footprint reduces space requirements in your facility
- ✓ Low maintenance requirements for continuous uptime
- ✓ GK's two-mass vibratory design requires very little energy to operate
- ✓ Easy to service liner design allows for quick changes when necessary
- ✓ Non-rotating design allows for easy access for both inspection and sampling
- ✓ Adjustable retention time
- ✓ Available in various sizes to meet capacity requirements
