

**Wireless Bluetooth Accelerometer with Free App**

**Designed to monitor your  
Vibratory Equipment**

The General Kinematics Wireless Portable Stroke Monitor connects with our free smartphone app. This device allows users to measure the performance of your vibratory equipment as well as monitor multiple pieces of equipment over time.

- Triaxial accelerometer allows you to place the sensor in any location with no directional orientation necessary.
- Powerful magnets ensure the sensor stays firmly attached to even the highest G-force machines.
- The main screen on the mobile app displays Total Stroke and RPM and the detailed screen in the app shows X, Y, and Z strokes independently.
- Email send feature includes the data points for X, Y, & Z strokes; Total Stroke; and RPM.
- Create user defined names for each piece of equipment being monitored.

Price: \$540.00 Part No. 10-07-317-A
